

Devon Chen

Senior Staff Infrastructure Engineer | Distributed Systems & Kubernetes Platforms

Seattle, WA | devon.chen.infra@gmail.com | (206) 849-0123 | github.com/devonchen-infra | linkedin.com/in/devon-chen

TECHNICAL SKILLS

Languages: Go, Rust, Python, Bash, C++, TypeScript, SQL

Cloud & Orchestration: Kubernetes, AWS (EKS, EC2, S3, RDS, IAM), GCP (GKE), Terraform, Helm, ArgoCD

Distributed Systems & Observability: Kafka, Envoy, Istio, Prometheus, Grafana, OpenTelemetry, Jaeger, etcd

Database & Storage: PostgreSQL, CockroachDB, Redis, DynamoDB, Ceph, RocksDB, MinIO

PROFESSIONAL EXPERIENCE

Senior Staff Infrastructure Engineer

2021 - Present

Stripe Inc. | Seattle, WA

? Architected and led the global multi-region Kubernetes platform hosting 1,200+ microservices processing \$800B+ annual payment volume with 99.999% uptime.

? Engineered custom Envoy service mesh control plane in Go, reducing p99 service-to-service RPC latency from 14ms to 2.1ms across 40,000 compute nodes.

? Authored automated disaster recovery system with active-active regional failover executed in under 45 seconds with zero data loss.

? Spearheaded enterprise FinOps initiative optimizing cloud resource bin-packing and spot instance utilization, reducing AWS spend by \$14M annually.

Staff Infrastructure Engineer

2018 - 2021

Datadog | New York, NY (Remote)

? Designed petabyte-scale distributed ingestion pipeline utilizing Apache Kafka and Rust workers handling 35M metrics/sec at peak load.

? Developed custom Kubernetes operator for automated stateful shard rebalancing across 500+ Elasticsearch and ClickHouse clusters.

? Standardized infrastructure-as-code modules in Terraform and Atlantis, cutting service provisioning time from 2 weeks to 15 minutes.

Senior DevOps / SRE Engineer

2015 - 2018

Twilio | San Francisco, CA

? Scaled real-time voice and SMS gateway infrastructure across AWS multi-region deployments.

? Implemented comprehensive Prometheus alert routing and SLO framework, decreasing mean-time-to-detection (MTTD) by 60%.

Software Engineer (Systems)

2012 - 2015

Amazon Web Services (AWS) | Seattle, WA

? Contributed to core EC2 control plane backend written in C++ and Java.

? Built automated hardware fault isolation agent monitoring physical host health across 200,000 servers.

OPEN SOURCE & PROJECTS

kube-net-mesh (Go, eBPF)

2022 - Present

High-performance eBPF-based network topology visualizer and connection tracer for Kubernetes clusters with 2.8k+ GitHub stars.

raft-kv-rs (Rust)

2020 - 2021

Educational distributed key-value database implementing Raft consensus with linearizable reads and automatic snapshot compaction.

terraform-aws-eks-platform (HCL)

2019 - Present

Modular production-ready Terraform blueprint for enterprise EKS deployments used by 80+ organizations.

EDUCATION

Bachelor of Science in Computer Science (Honors)

2008 - 2012

University of Washington, Seattle, WA

CERTIFICATIONS & PATENTS

- Certified Kubernetes Administrator (CKA), Linux Foundation, 2020
- AWS Certified Solutions Architect - Professional, 2019 (Renewed 2022)
- US Patent #10,984,210: Automated Shard Rebalancing in Distributed Ingestion Clusters, Issued 2021
