FEATURED OPEN SOURCE & INDEPENDENT PROJECTS

HyperCanvas - High-Performance Collaborative Whiteboard

Stack: Rust, WebAssembly, WebSockets, React, CRDT (Yjs), WebGL | github.com/mayalin-dev/hypercanvas

? Implemented conflict-free replicated data types (CRDT) for real-time multiplayer editing with sub-20ms synchronization latency.

? Gained 4,200+ GitHub stars, 15,000+ monthly active users, and 120 community contributions.

GraphPulse - Real-time GraphQL Query Analyzer & Linter

Stack: TypeScript, Node.js, GraphQL AST, React, Electron | github.com/mayalin-dev/graphpulse

? Created an extensible desktop IDE and CLI tool for static analysis, N+1 problem detection, and performance profiling of GraphQL schemas.

? Adopted by 8 enterprise engineering teams; featured on Product Hunt (#2 Product of the Day with 850 upvotes).

FastKV - Embedded In-Memory Store with Persistent WAL

Stack: Rust, Tokio, Memory-Mapped Files | github.com/mayalin-dev/fastkv

? Designed a lightweight embedded key-value storage engine achieving 1.2M operations/sec single-threaded with write-ahead logging.

? Implemented lock-free SkipList index and zero-copy binary serialization format.

PROFESSIONAL EXPERIENCE

Senior Full-Stack Engineer

2021 - Present

Vortex Media Labs | San Francisco, CA

- ? Architected the next-generation video streaming management dashboard in Next.js, TypeScript, and GraphQL.
- ? Optimized initial page load performance, improving Largest Contentful Paint (LCP) from 3.8s to 0.9s across web clients.
- ? Integrated real-time WebSocket analytics dashboard processing 40,000 telemetry events per second.

Full-Stack Software Engineer

2018 - 2021

PixelCraft Studios | Oakland, CA

- ? Built interactive frontend web applications and Node.js REST APIs serving 4M monthly users.
- ? Engineered payment gateway integration with Stripe handling \$18M in annual transactional volume.
- ? Mentored 4 junior frontend developers on TypeScript best practices and component unit testing.
