

RAJEEV RANJAN PRAJAPATI

Node.js Developer — Backend Engineer — Full-Stack Engineer

+91 7319932743 — prajapati7.ranjan@gmail.com

linkedin.com/in/rajeevranjan22011999

Professional Summary

Results-driven Node.js Developer with 3+ years of experience designing, developing, and deploying scalable backend services, full-stack web applications, and IoT solutions. Strong expertise in Node.js, Express.js, Angular, MongoDB, PostgreSQL, MySQL, RESTful APIs, Microservices Architecture, and AWS Cloud Services. Experienced across the complete Software Development Life Cycle (SDLC), including analysis, development, testing, deployment, production support, and client communication. Proven ability to deliver secure, high-performance applications while collaborating within Agile teams.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python

Backend Technologies: Node.js, Express.js, RESTful APIs, Microservices Architecture, Event-Driven Systems

Frontend Technologies: Angular, React.js, HTML5, CSS3

Databases: MongoDB, PostgreSQL, MySQL, SQL, Sequelize ORM

Cloud Technologies: AWS Lambda, AWS API Gateway, AWS S3, AWS Load Balancing, Azure IoT Hub

Security: JWT Authentication, Auth0, Role-Based Access Control (RBAC), SSL/TLS, API Security

Development Practices: SDLC, Agile Scrum, CI/CD Pipelines, System Design, Performance Optimization, Technical Documentation

Tools & Servers: Git, Apache, Nginx

Professional Experience

SensorVision IoT Solutions Pvt. Ltd.

Sep 2022 – Present

(Formerly Software Associates Information Technologies Pvt. Ltd.) Web Developer

- Developed scalable MEAN stack applications using MongoDB, Express.js, Angular, and Node.js to meet business and client requirements.
- Designed and implemented backend services, REST APIs, and microservices-based architectures for enterprise applications.
- Architected and delivered end-to-end IoT solutions integrating AWS IoT and Azure IoT Hub using MQTT and HTTP communication protocols.
- Integrated third-party APIs, cloud platforms, and microservices to enable seamless device-to-cloud communication.
- Participated in Agile development processes including sprint planning, development, testing, deployment, and production support.
- Conducted debugging, troubleshooting, code reviews, and technical documentation to improve software quality and maintainability.
- Collaborated directly with clients to gather requirements and ensure successful project delivery.

Projects

Client Management Tool

Nov 2025 – Present

Technologies: Angular, Node.js, Express.js, MongoDB, JWT, SSL

- Developed and maintained full-stack features using Angular, Node.js, Express.js, and MongoDB.
- Implemented JWT-based authentication and Role-Based Access Control (RBAC) to secure application access.
- Configured SSL certificates and deployed secure HTTPS-enabled production environments.
- Conducted unit testing and debugging activities to maintain application stability.
- Mentored junior developers through technical guidance and code reviews.

TradesMan

Jan 2025 – Oct 2025

Technologies: Node.js, Angular, Sequelize ORM, MySQL, Microservices

- Designed and implemented a scalable microservices architecture using Node.js and Sequelize ORM.
- Developed Angular frontend modules and backend APIs supporting business workflows.
- Improved application maintainability through modular service design and structured API development.
- Conducted unit testing and quality assurance activities to ensure software reliability.

Marsonik

Jun 2024 – Nov 2024

Technologies: Angular, AWS S3, AWS Lambda, API Gateway

- Managed client communication and coordinated project delivery activities.
- Enhanced frontend functionality through continuous feature development and maintenance.
- Deployed applications using AWS S3, API Gateway, and AWS Lambda serverless services.
- Collaborated with stakeholders and cross-functional teams to ensure successful project execution.

Farmo

Sep 2023 – Apr 2024

Technologies: Node.js, Express.js, PostgreSQL, Sequelize ORM, Angular, Stripe

- Architected and implemented microservices-based backend services using Node.js, Express.js, Sequelize ORM, and PostgreSQL.
- Integrated Stripe payment processing, subscription lifecycle management, coupon handling, and billing automation.
- Led end-to-end full-stack development across backend APIs and Angular frontend components.
- Maintained CI/CD pipelines and collaborated with QA teams to support automated deployments.

FleetAnalytix

Oct 2022 – Sep 2023

Technologies: Node.js, Angular, AWS Lambda, EventBridge, SQS, Sequelize

- Designed and developed microservices using Node.js, Express.js, Sequelize ORM, and SQL databases.
- Implemented event-driven architecture using AWS Lambda, EventBridge, and Amazon SQS.
- Developed Angular frontend modules integrated with backend APIs and cloud services.
- Conducted testing, debugging, and performance optimization activities to improve reliability.

Education

Master of Computer Applications (MCA)

2019 – 2022

National Institute of Technology Calicut

CGPA: 7.02

Bachelor of Computer Applications (BCA)

2015 – 2018

Magadh University, Patna

CGPA: 6.50
