EXPERIENCE

Software Engineer -II

Probus Smart Things

📅 Sep 2024 – Present 📍 Noida

- Led development of a production-ready **RAG backend** from scratch using Django, integrating OpenAI and Gemini APIs, ChromaDB vector search, document chunking, and hybrid query routing with parallel LLM processing and intelligent answer selection.
- Developed a **Python/Django** -based service to automate DISCOM and OA bill processing, leveraging AI for DISCOM bill parsing and regex-based extraction for OA bills to convert unstructured billing documents into structured data.
- Developed **Java (Spring Boot)**-based backend microservices for a Head-End System ingesting on-demand and scheduled smart meter data from lakhs of devices using **Kafka** and **StarRocks DB**.
- **Technology: Python, Django, Java, Spring Boot**

Software Engineer

Accenture

📅 July 2022 – Sep 2024 📍 Gurgaon

- Developed full-stack applications using **Python/Django** for backend and **React.js** for frontend, building RESTful APIs and dynamic user interfaces with modern hooks and state management.
- Integrated advanced security measures such as JWT token authentication, role-based access control (RBAC), and input validation to ensure data integrity and prevent unauthorized access.
- Developed and optimized Python/Django backend services for high-volume data processing, implementing reusable components, database operations, API integrations, and asynchronous workflows to improve system scalability and performance.
- **Technology: Python, Django**

Software Engineer Intern

Beyond Byte Solution

📅 Feb 2022 - June 2022 📍 Surat

- Developed an Android application for a tuition class that enabled the upload and secure access of lecture videos, ensuring only authorized students could view the content.

SKILLS

Python Django Java Spring Boot React JS
React Native Microservices JavaScript AWS
Android Development Problem Solving MVC
SQL / MYSQL MongoDB Agile Methodology
Git

PROJECTS

Wholesaler E-commerce Application

Self-Learning Project

📅 May 2024 – Present

- **Admin/Manager Application:** Developed an admin panel to manage customer access and product permissions, ensuring only authorized customers can view and purchase specific products.
- **Customer Application:** Developed a cross-platform mobile application for customers. Added functionality to prevent screenshots of products and set time-bound visibility for products as decided by the administrator.
- Implemented Two-Factor One-Time Password (OTP) Authentication and token-based authorization for secure access.
- **Technologies: React Native, Python Django, PostgreSQL, AWS S3, Heroku.**
- Application Link -> [Google Play Store Link](#)

Photo Factory Studio

Self-Learning Project

📅 April 2023 – Present

- Created a comprehensive app allowing photographers to upload event photos, allowing guests to access and download these photos seamlessly.
- Built robust back-end services with Django to handle large-scale photo uploads, storage, and retrieval, ensuring efficient and secure management of event photographs for both photographers and guests.
- [Google Play Store link](#)
- Link of Admin Website -> [Website Link](#)
- **Technology: Python, Django, Javascript, React Native, MogoDb, AWS.**

EDUCATION

B.Tech in Computer Science and Engineering

VIT, Chennai

📅 July 2018 – July 2022

CGPA:8.43
