

ANKIT JHA

Software Development Engineer II

EMAIL: mailto:ankitjha6035@gmail.com **PHONE:** 9570716035 **LOCATION:** Noida, U.P, India
LinkedIn: <https://linkedin.com/in/ankitihajavafullstackdeveloper>

SUMMARY

I am a results-driven Software Development Engineer II with 4 years of experience in backend development, specializing in Java, Spring Boot, and Microservices. I have a strong background in building scalable and secure applications and am adept at REST APIs, Kafka, and cloud deployment.

SKILLS

Languages & Databases: Java, SQL, MySQL, PostgreSQL, MongoDB

Frameworks: Spring Boot (Security, Data, Cloud), Hibernate, JPA

Microservices & Distributed Systems: Architecture, Saga Pattern, API Composition, Eureka, Zuul, Config Server, Redis, Apache Ignite, Apache Kafka, MQTT, Weblogic JMS

Cloud & DevOps: AWS, Google Cloud, Docker, Kubernetes, Jenkins, Maven

Tools & Practices: JWT, OAuth2, SOLID, Git, GitHub, Agile/Scrum, Jira

Observability & Testing: ELK Stack, Prometheus, Grafana, Logback, SLF4J, JUnit, Mockito, Swagger

EXPERIENCE

SDE 2

Probus Smart Things!

Date: 07/2022 – Present

Location: Noida, UP, India

- Engineered scalable Spring Boot microservices using SOLID principles, Saga pattern, and Spring Cloud for distributed consistency.
- Developed high-throughput event-driven data pipelines utilizing Kafka and MQTT for asynchronous communication.
- Optimized performance via Ignite caching and Hibernate query tuning; implemented CI/CD pipelines with Jenkins and GitHub Actions.

SDE Intern

Navyug Infosolutions Pvt. Ltd

Date: 02/2022 – 06/2022

Location: Noida, UP, India

Developed backend services using Java, Spring Boot, and PostgreSQL, while gaining hands-on experience in REST API development and Git version control.

PROJECTS

Head End System (HES)

Date: 02/2025 – present

- Architected a scalable microservices-based Head End System for smart meter data ingestion and analytics.
- Leveraged REST APIs, Apache Kafka, MQTT, Weblogic JMS to manage high-volume synchronous and asynchronous data streams.
- Ensured distributed data consistency using Saga design patterns and eventual consistency strategies.
- Streamlined deployment and monitoring through Docker containerization, Kubernetes, and Jenkins CI/CD.

Network Monitoring System

Date: 11/2023 – 01/2025

- Developed a scalable backend using Spring Boot and multithreaded architecture to monitor millions of 4G/NB-IoT smart meters.
- Utilized TCP/UDP protocols and Apache Kafka for direct data transmission and high-volume event processing.
- Implemented Saga pattern and API Composition for transactional consistency across Eureka-discovered microservices.
- Centralized system configurations using Spring Cloud Config Server to enhance maintainability.

Solar String Monitoring System

Date: 09/2022 – 10/2023

- Built a real-time backend for solar performance monitoring integrated with MQTT and Apache Kafka streaming.
- Developed a monitoring dashboard using Thymeleaf and jQuery featuring real-time anomaly alerting.
- Deployed portable and scalable services using Docker containers.

EDUCATION

M.C.A NIT Calicut

Date: 07/2019 – 06/2022

Location: Kerala, India

B.SC-IT Magadh University

Date: 07/2015 – 08/2018

Location: Patna, India
